Easy fix

EASY FIX is an innovative system for easy installation that is used in single-handle faucets by VALVEX. It significantly reduces the installation time.

Adjustable direction of water flow

The faucet aerator with an adjustable angle of water flow allows adjusting the jet angle in the range of 7 degrees in either direction.

Aerating stream regulator

The jet regulator that aerates the faucet aerator is equipped with a mixing mechanism that mixes the flowing water with air. This simple solution gives noticeable savings in water consumption, which can reach up to 50%.

Easy clean

The faucet aerator is equipped with EASY-CLEAN technology with an anti-scale system and a rubber finish which makes it resistant to scaling and easy to clean and maintain.

Save money

The faucet aerator with the SAVE MONEY system reduces the flow of water up to 4.5 l/min., regardless of water pressure, thereby reducing the maximum consumption.

Discover
the mesmerizing
flow of the
MIKADO
faucet aerator

Replace regular hand washing with a stunning experience with MIKADO faucet aerator. Using single flows of water, it creates a unique geometric pattern, thus saving water (flow of only 1.9 l/min.) and the comfort you have been accustomed to.

MIKADO is an innovative faucet aerator that you will be delighted with, and your hands will be given incredible sensations: from gently pleasant to a vigorous massage.

MIKADO is available in selected models of faucets.
