## **The Art of Thoughtful Design**

Every home moves to its own rhythm. It unfolds in quiet mornings in the bathroom, family gatherings in the kitchen and moments of togetherness. As a Polish brand specialising in sanitary fittings, we have long been creating solutions that become a natural part of these moments – discreetly present, reliable in use and thoughtfully designed for comfort.

Our portfolio includes a wide range of bathroom and kitchen taps – from classic wall-mounted models to modern concealed systems – tailored to a variety of interior styles and the expectations of discerning users.

We are inspired by what endures and stands the test of time. We draw from everyday life – from its simplicity and functionality. We believe that well-designed fittings should be not only aesthetically pleasing, but also intuitive – present in life's most meaningful moments, fostering a sense of reassurance.

Our experience underpins every collection we create. At every stage, we keep the user in mind – from the initial idea, through the selection of materials and technology, to the smallest finishing touch. We do more than deliver products. We strive to become part of interiors with character – spaces that shape a home and stay with those who live in them for years to come.

## Power of Quality and Comfort Design

Our designs are rooted in the belief that true quality arises from balance. From the union of technology and design, precision craftsmanship and attention to detail. We believe that comfort of use should be felt in every gesture.

The Power of Quality and Comfort Design is a force driven by experience, conscious design choices and responsible manufacturing. It is reflected in solutions refined to offer uncompromising quality, day after day.

## Design

Design is the language through which we express our brand. It is a dialogue between aesthetics and technology, between the need for comfort and the pursuit of beauty.

We create solutions that are both refined in appearance and intuitive to use. Our inspiration comes from nature, architectural precision and contemporary ways of living. We observe proportions and textures that lend spaces their timeless character. We experiment with colour and form, giving our products a distinctive yet enduring identity.

We ensure that design works seamlessly with ergonomics, ease of installation and solutions that encourage a more sustainable lifestyle. Because good design is not only about how something looks, but how well it responds to the demands of modern living.

## Quality

Quality lies at the heart of our philosophy.

We create in Poland, in our own manufacturing facility, where expertise meets advanced technology. Every project is overseen by experienced specialists, from the initial concept through to the final detail.

We carefully select high-quality materials and subject our products to multi-stage testing to ensure long-lasting performance and reliability. We design with intention – creating solutions that are refined, dependable and intuitive in everyday use.

For us, quality is more than a standard of workmanship. It is a sense of reassurance that accompanies users every day. It is experience built over years and expertise we continuously develop to deliver solutions that meet the highest expectations.

# ALLORA

What surrounds us has a profound impact on our everyday lives and well-being. Create an interior that is unique, inviting, and functional – a space that truly reflects your personality. Feel the inspiration and design a timeless oasis of comfort.

# MODERN FUNCTIONALITY

The individual elements of the mixer, seamlessly integrated and discreetly connected, create a striking focal point in any bathroom. Pull-out shower hose provide complete freedom of movement, enhancing everyday comfort during bathing. A high-quality ceramic cartridge ensures smooth and precise water flow control – everything remains perfectly balanced and under control.

The four-hole bath mixer offers both practicality and refined aesthetics. Individually mounted components – the spout, hand shower, control handle, and diverter – integrate harmoniously into modern bathroom interiors.

# GREAT VIBE

A refined composition that enchants with its elegance and leaves a lasting impression.

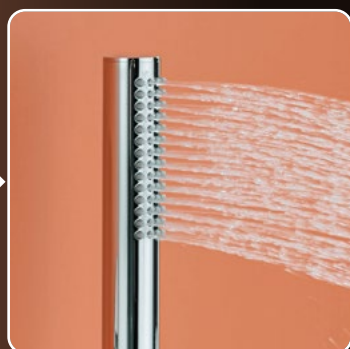

Water temperature control

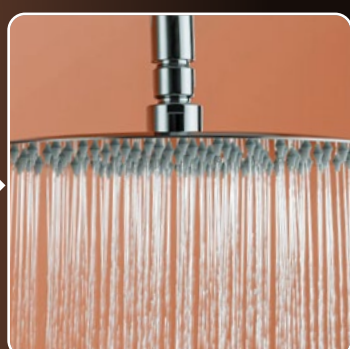

Hand shower activation

Water flow control

Rain shower activation

# MODERN SHOWER COLUMN

Three-function shower columns are an integral part of the ALLORA collection. Each function is activated intuitively using the control knob.

You can switch between the overhead rain shower, hand shower, or spout function, ensuring maximum comfort and versatility.

The integrated spout allows you to quickly wash your hands or to conveniently fill containers with a steady stream of water. For added functionality, the adjustable aerator enables precise control of the water flow direction.

# VARSO

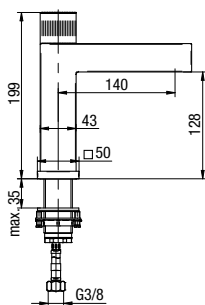

Defined by a slender body, the taps convey a sense of lightness and refinement. The knurled control replaces the traditional lever, adding a distinctive decorative touch.

# AVOLA

Its striking, geometric body and slender proportions make the tap the focal point of any space. The distinctive form creates a tension between simplicity and bold expression, shaping the space around it.

# SOHO

ECLECTIC  
METROPOLITAN  
STYLE

Our mixer taps fit seamlessly into interiors featuring both natural, raw materials and luxurious glamour-style accents. Whether as striking centrepieces or subtle decorative elements, they enhance the ambiance of a space designed for self-expression and quiet moments alone with water.

A soft, aerated stream of water gently envelops your hands, enhancing everyday comfort while reducing water consumption. The integrated aerator optimises flow efficiency, making even the most frequent daily tasks more sustainable.

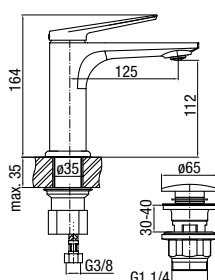

The environmentally conscious SAVE MONEY aerator, classified in water flow class Z, ensures that washbasin mixers use less than 9 litres of water per minute. This solution helps reduce water consumption, benefiting both the environment and your household budget.

SOHO

# ECLECTIC METROPOLITAN STYLE

Experience New York-inspired chic in your own bathroom with the geometric design of the SOHO collection. With their slim body, refined lever, and softly rounded edges, the mixers integrate seamlessly into a cohesive, distinctive space – the bathroom you've always envisioned.

additional fittings	hand shower, hose 1500 mm

The versatility of the collection is highlighted by a range of refined finish options. Each mixer and set is available in four finishes: Chrome, Black, Satin Copper, Brushed Gold and Gun Metal.

The latter three are created using advanced PVD technology – an innovative coating process that ensures exceptional durability and resistance. The resulting finishes combine distinctive aesthetics with a modern, premium character.

The compact, dual-function embedded shower set is an alternative to the shower column. If you prefer a discreet installation in the wall and more space in the shower booth, this will be the perfect solution for you.

# MODERN FUNCTIONALITY

The individual elements of the mixer, invisibly connected with each other, create an impressive bathroom decoration. Pull-out shower hose ensure full freedom of movement during bathing.

The high-class ceramic head enables smooth and precise water flow regulation. Everything is under control, in full harmony...

The 4-hole bath mixer is practical and convenient to use. The separately mounted spout, hand shower, handle, and switch perfectly fit into modern arrangements.

# DECOR

The patented design of the temperature control knob gives it a unique style and ensures comfortable and precise operation.

Thanks to the quick water start and the ability to set a constant, optimal temperature, DECOR offers greater everyday comfort and ease of use. This way, you save water, time, and money.

You'll never accidentally turn on more water than you need, as DECOR mixer taps maintain a constant flow rate.

# WATER AT A SINGLE CLICK

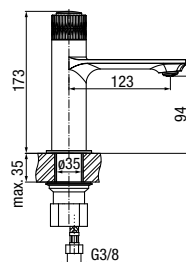

The new DECOR series combines cutting-edge technology and innovation with a lifestyle rooted in the philosophy of sustainable living. From now on, enjoy water in a convenient, modern, and responsible way.

additional fittings	shower head, hand shower, hose 1500 mm	

Three-function shower columns are an integral component of the DECOR line. The individual functions of the column are activated by clicking on one of the three delicate square buttons located in the body.

Press one of these buttons to choose from the rain shower, the shower head, or the spout function.

The spout, which is an integral part of the body, is used when you need to quickly wash your hands under a fast stream of water or to pour water into a container. Importantly, the aerator's movable disc allows you to change the direction of the water outflow.

The aerator of the shower column faucet will be a helpful tool for many tasks around your home.

No matter your height – our shower column can be precisely adjusted to your preferences. Set the height of the overhead shower or slide the adjustable hand shower holder – and you're done.

3-function hand shower.

# ESTO

THE  
POWER  
OF  
DELICACY

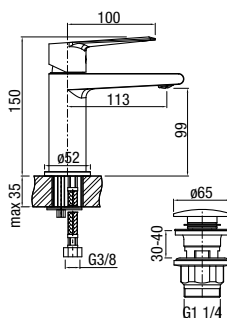

ESTO is inspired by the charm of small towns, where life moves at a gentler pace and every detail carries meaning. Its design is rooted in a simple cylindrical form, complemented by a gently tapered lever. This detail transforms the overall perception – adding refinement and visual lightness. Inspired by places where simplicity and mindfulness define everyday living, the collection brings a feeling of cosiness into your home.

# DIYA

## SERIES

It reflects the atmosphere of a refined spa – serene, calming and refined in every detail. Perfectly suited to spaces where the shower takes centre stage.

A thermostatic tap maintains a stable water temperature, creating a sense of comfort and reassurance. Relaxation begins in an instant.
